Re: EAS Doors

EAS Doors installed their 2 panel, 800 series, hurricane rated sliding glass door in my home in Niceville, Florida. I am extremely pleased with both the quality of the door and the impeccable workmanship performed by EAS Doors. Your installation crew was very efficient and professional. The superior materials used in the fabrication of the door puts it head and shoulders above any visually similar product that would be supplied by all other contractors. EAS Doors is a company that goes the extra mile. I would also like to give them praise for their sensational customer service. Since the new door installation in December, 2010, there are no signs of water and or air infiltration. I highly recommend EAS Doors to anyone looking for the best door solution to protect your home in the event of a hurricane.

Sincerely,

Michael D. Simpkins
